### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

Instant claim 1 discloses a multidisk brake with a torque tube and a centering bearing. Said centering bearing has an asymmetrical stiffness along orthogonal axes. Berwanger discloses a multidisk brake system with a torque tube that has an asymmetrical stiffness. Berwanger is silent about a centering bearing though such bearing are known. Berwanger discloses several advantages to the asymmetrical design in addition to vibration damping, namely mass reduction and reduction of heat transfer. It is the examiner's opinion that one of ordinary skill in the art would not have considered using an asymmetrical centering bearing instead of a modified torque tube obvious because there would be sufficient motivation not to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
